

The 2023 IFEA report from the Jean-Marie Laurichesse Research Grant Award Committee.

Aug/09/2023

Dear IFEA President.

Alan Nerwich

I hope this message find you well. The Grant committee that I chaired, received 3 applications this year. We invite all IFEA members to take advantage of this great opportunity of the research grant, in order to support part of their research projects.

I am writing to inform you the outcome of the evaluation of the submitted abstracts for the research grant this year. Our review panel carefully assessed each submission based on their quality originality, significance and alignment with the grant's objectives.

After a thorough review process, it is with regret that I must inform you that none of the submitted abstracts have been deemed of sufficient quality and importance to received the research grant. Our reviewers evaluated each abstract against the established criteria aiming to identify projects with the potential for impactful and innovate research contributions.

It is important to note that his decision does not reflect negatively on the applicants' abilities or potential as researchers. The competition for research funding is fierce, and our panel had to make difficult choices given the limited resources available for granting this year.

If you have any questions, please feel free to contact me

The submissions received were:

1. ROLE OF BIO ENGINEERED NATURAL SCAFFOLD WITH SPECIALIZED PRO RESOLVING MEDIATORS ON INFLAMED HUMAN DENTAL PULP STEM CELLS- A LAB BASED STUDY
2. DESIGN AND DEVELOPMENT OF A COMPACT SURFACE PLASMON RESONANCE (SPR) BASED BIOSENSOR DEVICE FOR EVALUATION AND QUANTIFICATION OF MICROBIALFLORA IN INFECTED ROOT CANAL SYSTEMS
3. ROLE OF ORGAN PERFUSATE SOLUTION AS AN AVULSION MEDIA/ RECONDITIONINGMEDIA FOR TEETH IN ENHANCING CELL VIABILITY

Respectfully

David E. Jaramillo DDS  
Chair Jean-Marie Laurichesse Research Grant Award Committee
